

Safety Leadership Skills

This **three-day course** provides team leaders with the opportunity to develop leadership and safety skills specific to their responsibilities. The focus of the course is practical, competency based skill development in the core aspects of the Leader's role, including Job Safety Analysis.

Experience teaches us that outstanding safety performance is not about enforcing compliance. It is about right attitudes, relevant knowledge, appropriate behaviour and correct actions. It is about developing people and the organisation to be compliance-orientated but, more importantly, committed to the belief that safety is a way of life.

Target Audience

This program builds on the role of individuals who are first line managers from a wide range of organisational and industry contexts. They may have existing qualifications and technical skills in any given vocation or profession, yet require leadership skills or recognition in supervisory functions.
