

Basic Chemical Spill Response

Overview

An ever increasing range of hazardous substances are being used in the workplace today.

Do you know the steps in a chemical spill response procedure? Can you accurately identify chemicals in the workplace?

During this interactive course, participants will learn to identify chemicals and respond safely to minor chemical spills.

Regular training in the correct use of spill response equipment will ensure personnel are able to employ safe methods to control spills effectively.

Intended for

Operational personnel or any staff required to identify and undertake a first response approach to controlling a chemical spill.

Learning Outcomes

- Identify chemicals in the workplace
- Review a Material Safety Data Sheet (MSDS)
- Follow chemical response procedures
- Respond to a chemical spill using spill kits and tools
- Follow company reporting procedures

Certification

A Certificate of Participation will be issued at the end of the course.

Customised Training

If you have six or more participants, the course can be presented at your workplace using customised site based examples.

Prerequisites

Minimum dress standards apply - neat casual, enclosed footwear and no singlets

Duration: 2 hours

Fee: Contact AVELING for group rates

Dates: On request
