

Hazard Management

Overview

This award winning safety program provides participants with the knowledge to identify and manage hazards successfully in the workplace.

The emphasis of the course is on no-nonsense, practical learning tools that can be readily transferred to the work environment.

Intended for

Those wanting to improve their skills in identifying and controlling hazards.

Learning Outcomes

- Understand hazard management, including identifying types of hazards and determining threats
- Understand and interpret the hierarchy of control
- Deal with incidents effectively
- Determine consequences
- Assess risks
- Develop a Job Safety Analysis

Certification

A Certificate of Participation will be issued at the end of the course.

Customised Training

If you have six or more participants, the course can be presented at your workplace using customised site based examples.

WA Worksafe Award

This course won the WA WorkSafe Award in 2005, recognising outstanding achievements that contribute to reducing safety and health risks in the workplace.

Prerequisites

Minimum dress standards apply - neat casual, enclosed footwear and no singlets
