

Manage a Project

Overview

This course is designed to provide participants with a practical understanding of the key components of project management such as the successful completion of a specific goal or objective.

Participants will also examine the various aspects of successful project management including planning, organising, securing and resource management to achieve the desired outcome.

Intended for

People who plan, organise and manage a workplace project.

Learning Outcomes

- Plan and manage project resources and risks including project controls
- Understand the Critical Path analysis technique, Gantt (bar) Charts and schedules to manage
- Accommodate project changes and variations

Qualification Pathway

Successful course participants have the option of completing a work based project covering a unit of competency that can contribute to the achievement of a Diploma qualification.

- BSBPMG510A Manage Projects

Certification

A Certificate of Participation will be issued at the end of the course.

On successful completion of workplace assignments, a Statement of Attainment will be issued for the Unit of Competency outlined above from the BSB07 Training Package.
