

Electrical Worker Competency and Arc Flash

Overview

These courses deal with RTIO safe electrical work procedures, management of electrical and arc flash hazards and the selection of correct arc flash Personal Protective Equipment (PPE).

The aim is to ensure all electrical personnel remain current with changes to applicable electrical codes, technology and safe work practices.

Intended for

All electrical personnel working on RTIO sites.

Learning Outcomes

Electrical Worker Competency

- Know the minimum electrical safety requirements for electrical work on RTIO sites
- Identify and manage electrical hazards within the designated area of work
- Test and check electrical installations

Arc Flash

- Understand hazards associated with arc flash
- Select the correct Personal Protective Equipment (PPE) when exposed to an arc flash

Certification

On successful completion of the course participants will receive an Electrical Worker Competency Card.

Prerequisites

Participants are required to have sufficient numeracy and literacy skills to read and comprehend instruction. Special language, literacy and numeracy requirements should be advised at the time of booking.

- Participants must bring identification
- Minimum dress standard - neat casual, enclosed footwear and no singlets
- A completed Training Request Form is required prior to or on the day of the induction to ensure participants are issued their cards.
